Short Description of the Organization / Department	We are a tech-savvy team which has been working together for over five years. Our core competencies are high coordination within the group, idea/feature execution and quick experimentation. At Consolidity, it's a collective mindset that starts from the top and trickles down through each member of staff. We have experience building software and digital solutions, through the parent company, RHND Kft in Hungary. We developed digital payment infrastructures for Mastercard and worked on various features for HBO, Rakuten, Viber and more. We have a proven track record of successfully launched startups.		
Previous Related Projects / Research Experience	The founding team has a proven track record of successful startups and ventures: **2013 -** Fantasy football game for the Hungarian Football Federation (MLSZ) **2014** - Seed Round - Startup of the Month in May by Microsoft Europe TheFantasyFootball – Facebook fantasy football game **2015** - Fantasy Sports Trade Association (FSTA) membership **2016** - Series A Round - TheSix – Daily fantasy soccer game **2017** - 1st overseas company to enter the Chinese market with fantasy games for mobile. Controlled Skilled Game License of the Malta Gaming Authority (MGA) **2018** - Creating the official game of the CONIFA World Football Cup. League of Managers – Daily fantasy soccer games for Szerencsejáték Zrt., the Hungarian national gaming service provider.		
Short Description of the Project idea (if foreseeable)	Consolidity is a specialised, powerful and modern digital back-office. Its intuitive and flexible web-based application allows organisations to rapidly on-board, screen, self-generate necessary paperwork and manage their clients throughout their entire lifecycle. The on-boarding process becomes dynamic, the technology converts data into metadata subsequently used to automate usual manual recurrent tasks. Thanks to its smart end-user interface, Consolidity is uniquely engineered for departments seeking streamline customer-acquisition, automated data filing and data analytics supporting compliance.		

	It improves the relationship with clients, workflows and automates repetitive tasks. No more copy and pastes with clients' data into templates, forms, reports, invoices; compliance duties, AML checks, KYC requests, Risk Assessment, timesheet-invoices and communication with third-party providers are carefully automated.
	Consolidity is sold as a white label arrangement whereby the software runs on clients' servers and is GDPR compliant.
